Bigger TF, bigger SL, bigger TP, smaller lot size, longer run time! But with higher TF spread becomes less important and so we can trade more pairs. Conservative is a risk of 1% to 0.5% of account per trade. So do some math, first check how much have to be the SL then calculate the lot size with the risk to it.

The Jewish community of Prossnitz had established a technical school in 1843, and it became a public school for all the town's children in 1869—one year before young Edmund Husserl was sent off to Vienna's Realgymnasium. 1868 was also a year when civic authorities called for reform of Jewish education at all levels throughout Moravia.

Husserl, Edmund | Internet Encyclopedia of Philosophy

The students with average levels of math ability and strong math self-efficacies got about 45% of the questions correct. This means that by just having stronger math self-efficacy, a student of average math ability will perform 20% better than a student with similar math ability but weaker math self-efficacy.

A Priori and A Posteriori. The terms “a priori” and “a posteriori” are used primarily to denote the foundations upon which a proposition is known. A given proposition is knowable a priori if it can be known independent of any experience other than the experience of learning the language in which the proposition is expressed, whereas a proposition that is knowable a posteriori is known ...
