A Manual Of Indian Botany

Excerpt from A Manual of Indian Botany The textbooks of Botany commonly used in India are not exactly suited to the requirements of the Indian student. Most of the plants which they cite to illustrate the text are foreign to the plains of India, and serve no purpose other than to cram his memory with facts which he has no means to verify by actual observation.

Manual of Indian forest botany. (Book, 1953) [WorldCat.org]

This thesis reports on the research of 25 plants, used as herbal remedies since the 1800s by the author's Native American ancestors (the Day family) and the Cherokee tribe. The plants were identified in four state parks in southwestern Indiana. Information sources included the research literature, articles on Cherokee herbal remedies, and interviews with Cherokee elders and medicine men.

Bose wrote a botany book, A Manual of Indian Botany. The book was intended as a textbook containing plants familiar to Indian students, in contrast to the European textbooks commonly used in India at the time. He is also credited with starting the first agricultural journal in India.

Girish Chandra Bose - Wikipedia

The botanical text book, an introduction to scientific botany, both structural and systematic. This book is designed to furnish classes in our schools and colleges with a suitable text book of Structural and Physiological Botany, as well as private students with a convenient introductory manual, adapted to the present condition of the science.
