Autism Spectrum Disorder | Psychology Today

To put it in simple terms, autism is a “serious and lifelong developmental disability”. Autism, standing alone by itself as a diagnosis, is not a mental health problem or a learning disability. Autism is a spectrum disorder which means that each person with autism may share certain difficulties in common, yet they affect each individual differently.

Is Autism a Psychological Disorder? ASD and Mental Disorder

The autism spectrum encompasses a range of neurodevelopmental conditions, including autism and Asperger syndrome, generally known as autism spectrum disorders (ASD). Individuals on the autistic spectrum experience difficulties
