Classification

## **Unit 2: Taxonomy and Classification**

Classification - To put things into groups of some kind. It is usually done based on some type of similarities.

Classification Key - A device used to identify what group an organism or object is in. Most use a two choice system where you answer yes or no to each question to arrive at the correct group. (Also known as

### Biology

#### Classification

grouped, sorted, and classified? Why? From the time we begin to talk, we start to name things. We like to see how things are related. It is natural then, that biologists would name and organize organisms into a classification system. In this activity you will learn about the major classification groups and how organisms are named.
