These learning activities cover all of the understandings and skills in the IB guide for this topic. Lesson plans include resources to use on an interactive whiteboard and worksheets to print. There is a mix of laboratory work, theory lessons, and assessment materials with model answers.

IB Biology

In this activity students are shown how to calculate magnification and image sizes using scale bars. Then they learn how to calculate specimen size using magnification. The resources can be projected on the interactive whiteboard and there is a student worksheet with some extra examples for students to practice. There is also a short video screencast for this activity. How do we: The three ...

IB Biology: Calculating Magnification and Size

The field of biology is very broad in scope and can be divided into several disciplines. In the most general sense, these disciplines are categorized based on the type of organism studied. For example, zoology deals with animal studies, botany deals with plant studies, and microbiology is the study of microorganisms.

Biology — Characteristics of Life and Principles

The Ecology & Evolutionary Biology Specialist program (12.0 credits) provides an in-depth understanding of ecological and evolutionary patterns and processes, as well as the diversity of life forms (microbes, fungi, plants, animals). Concepts are taught using a broad array of approaches, including molecular studies, laboratory experiments, computer and mathematical modeling, and field studies.

Ecology and Evolutionary Biology - University of Toronto

Productivity is a rate function, and is expressed in terms of dry matter produced or energy captured per unit area of land, per unit time. It is more often expressed as energy in calories/cm²/yr or dry organic matter in g/m²/yr (g/m² x 8.92 = lb/acre). Hence, the productivity of different ecosystems can be easily compared.
