Note: The animation-duration property defines how long time an animation should take to complete. If the animation-duration property is not specified, no animation will occur, because the default value is 0s (0 seconds).. In the example above we have specified when the style will change by using the keywords "from" and "to" (which represents 0% (start) and 100% (complete)).

CSS Animations - W3Schools
The animation property in CSS can be used to animate many other CSS properties such as color, background-color, height, or width.Each animation needs to be defined with the @keyframes at-rule which is then called with the animation property, like so:.element { animation: pulse 5s infinite; } @keyframes pulse { 0% { background-color: #001F3F; } 100% { background-color: #FF4136; } }
