POGIL Chemistry Teachers Edition

XVhen designtng an experiment, you need to consider three types of variables. The independent variable is changed by the experimenter in the design of the experiment. This variable is sometimes called the "manipulated variable." The dependent variable is what changes as a result Of the change in the inde- pendent variable.

Morgan Park High School

Experimental Variables What is measured during a controlled experiment? Why? When scientists set out to do an experiment, they fi rst think about the variables that may affect the outcome of the experiment. A variable is any condition that may cause a change in the system being stud-ied. Some variables are measured quantitatively, like temperature, mass or height.
