Calculus. Distance And Velocity 1. The graph below shows the velocity, v , of an object (in meters/sec). Estimate the total distance the object traveled between $t=0$ and $t=6$. Just counting the squares (each of which has area representing $10 \text{ (m/s)(s)} = 10 \text{ m}$ of distance), and ...

The critical points of a cubic function are

Read Online Hughes Hallett Applied Calculus Solutions

its stationary points, that is the points where the slope of the function is zero. Thus the critical points of a cubic function f defined by $f(x) = ax^3 + bx^2 + cx + d$, occur at values of x such that the derivative $f'(x) = 3ax^2 + 2bx + c$ of the cubic function is zero. The solutions of this equation are the x -values of the critical points and are given, using the ...
