Bland-Altman plot : In analytical chemistry and biostatistics this plot is a method of data plotting used in analysing the agreement between two different assays. It is identical to a Tukey mean-difference plot , which is what it is still known as in other fields, but was popularised in medical statistics by Bland and Altman.

The Imperial Hotel (大飯店, teikoku hoteru) is a hotel in Uchisaiwaicho, Chiyoda ward, Tokyo. It was created in the late 1880s at the request of the Japanese aristocracy to cater to the increasing number of Western visitors to Japan. The hotel site is located just south of the Imperial Palace grounds, next to the previous location of the Palace moat.
