Meiosis (/ m ai ' oʊ s i s / ()); from Greek μείωσις, meiosis, meaning "lessening", because it is a reductional division) is a special type of cell division of germ cells in sexually-reproducing organisms used to produce the gametes, such as sperm or egg cells. It involves two rounds of division that ultimately result in four cells with only one copy of each chromosome (n).

Meiosis - Wikipedia

Wimsatt points out many other features that levels may have: For example, processes at higher levels tend to happen at slower rates than processes at lower levels, higher level properties are typically multiply realized by lower level properties, and higher-level causal relationships are dynamically autonomous in the sense of being largely independent of what happens at lower-levels.

Levels of Organization in Biology (Stanford Encyclopedia ...)

Concepts of Biology is designed for the introductory biology course for nonmajors taught at most two- and four-year colleges. The scope, sequence, and level of the program are designed to match typical course syllabi in the market. Concepts of Biology includes interesting applications, features a rich art program, and conveys the major themes of biology.

metrics that link nature to human well-being, explicitly identifying benefits needed and received by people ... the science has moved fully away from a focus on species and protected areas and into a shared human

nature environment, where the form, function, adaptability, and resilience provided by nature are valued most highly.

Biodiversity (Stanford Encyclopedia of Philosophy)

This human cephalosporin drug has proved to provide good broad spectrum activity in a variety of reptiles with the advantages that its half life is long and it kills Pseudomonas. Dose is 20 mg/kg IM or SC Q 72 hours. 3. Chloramphenicol (Chloromycetin). A bacteriostatic drug administered either IM or IV at a dose of 30-50 mg/kg/day for 7 to 14 days.

La célula (del latín cellula, diminutivo de cella, 'celda') [1] es la unidad morfológica y funcional de todo ser vivo. De hecho, la célula es el elemento de menor tamaño que puede considerarse vivo. [2] De este modo, puede clasificarse a los organismos vivos según el número de células que posean: si solo tienen una, se les denomina unicelulares (como pueden ser los protozoos o las ...
