There are three different ways to reset an Avaya 9600 series phone. The first method is called a "restart," and essentially reboots the phone without removing any important data. This is similar to rebooting a computer, and is useful if the phone is not performing properly. The second method is called a "reset."

The 10.0.0.1 IP Address. The 10.0.0.1 IP address is special because it can be used more than once. It belongs to the 24-bit block of private IP address, which are used for local area networks (LANs). Unlike public IP addresses, it's not possible to route private IP addresses through the internet, but that doesn't make them useless.
